

Setup Guide.

Welcome to the future of home Wi-Fi. Here is your guide for an easy setup that should take around 10 minutes.

Quick Setup:

Ideal for those who prefer a straightforward setup.

Setup with the mobile app:

For those who want to manage their Wi-fi network from their mobile phone.

Lets get started! Choose your preferred setup option.

Quick Setup

1

Take the extender out of the packaging and clip the base to the bottom.

2

Choose a location for your extender, we recommend the following:

- ✓ Place in a room away from your broadband router where extra coverage is needed
- ✓ Place in the open – not a book shelf or drawer.
- ✗ Do not place near other wireless devices – such as handsets or baby monitors.
- ✗ Do not place near water – such as a fish tank.

3

Connect the power cable and press the power button. A solid green power light means it's ready.

4

The extender will automatically configure, but could take up to **5 minutes**. A **green light** - steady or blinking - on the Wi-Fi icon means it's ready.

5

On your broadband router, press in the **WPS** on the back for **10 seconds** until you see the **2.4GHz** and **5GHz** lights start to pulse **green** and **orange**.

WPS

6

On your extender, press in the **WPS** button on the back for **10 seconds** until you see the Key icon pulsing **green** and **orange**.

7

Your router and extender will now pair with each other – this could take up to **two minutes**.

You're all done when the Key icon stops flashing and the **Wi-Fi** icon is **green**.

If the Link icon is **amber** or **red**, you might need to move it closer to your router to improve the connection quality.

8

Repeat this process for all extenders.

Setup using the mobile app

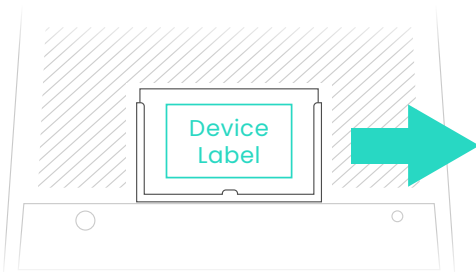

1

Download the **MPro Mesh** app from your app store. Open it and create an account.

2

Check your smartphone is connected to the Voneus Wi-Fi network. Details are located on the back of your broadband router.

ZYXEL

SSID: Voneus_XXXX
Wireless key: XXXXXXXX
Username: admin
Login Password: XXXXXXXX

3

On the MPro Mesh App home screen, it will start by finding, and adding your broadband router.

Once added, tap the **+** icon to start adding your extender and follow the instructions.

If your broadband isn't working or you're experiencing any technical issues you can chat to our technical support team.

Technical Support:

- **0333 880 4141 (option 2)**
- **helpdesk@voneus.com**

For any other queries you can call our main number **0333 880 4141 (option 5)** and we'll direct you to the right team.

You can also email **broadband@voneus.com** or visit **voneus.com** for further information.
